Project Management Tools such as MSEPM PWA (project web access) required.

Project Managers (PMs) are responsible for the overall direction, management, communication, coordination of status reports, stability of project oriented work efforts and success of their projects across the IT organization. PMs utilize project management processes and methodologies to ensure projects are delivered on time, within budget, adhere to high quality standards and meet customer expectations. They create scope documents based on approved charters and project plans (work breakdown structures.) They track key milestones and adjust project plans, budget requests and/or resources to meet the needs of customers. Accountable for managing and monitoring performance including providing guidance to the management and core team.

Responsible for:

- Escalating • Reporting
 - Communicating
 - Integration (ensuring various elements of the project are properly coordinated)
 - Boundary Management (working relationships within and outside team to accomplish goals)
 - Scope Management (aligning project tasks and team accountabilities within the boundaries of the agreed to scope document). Tracks events, tasks, dependencies, etc. in the project plan. Identifies tasks that are ahead / on / behind schedule. Identifies discrepancies in budgeted versus actual costs. Identifies items / issues that jeopardize the cost, quality or timeliness of project deliverables.
-
